capacity to govern and
manage the health
system**

Ministry of Health
capacity to manage
healthcare delivery
strengthened

**Rebuild public health
infrastructure in earth-
quake zone and USG
development corridors**

Treated as a cross-cutting
through each of the other
intermediate results

The centerpiece of new USAID health programming will support GOH in planning, managing and acquisition of health services. A key feature, USAID hopes to negotiate a **Fixed Amount Reimbursement Agreement (FARA)** with the GOH.

Additional procurements will be made to 1) strengthen the technical and management functions of GOH institutions and NGOs carrying out service delivery assistance, and 2) monitor performance and certify payments made through partner country systems.

Check USAID Business Forecast for updated information.

The new strategy prioritizes *coordination*

**~ with the Government of Haiti,
with other development partners, and within the U.S.
Government ~**

And *leadership* by the Ministry of Health
